THE PROBLEM: GENDER DISCRIMINATION

- Gender discrimination occurs across institutional domains, from education, to health care, to consumer markets, and beyond.
- Focus today on gender discrimination in employment.
- Specifically, I will discuss gender discrimination in hiring.

DEFINING GENDER DISCRIMINATION

- Gender Discrimination:
 - Differential treatment of a person (or group) due to their gender.
- Focus on behaviors, rather than attitudes, beliefs, or ideologies.
- Gender Discrimination Example:
 - A woman has equal (or superior) skills, educational credentials, and ability compared to a man.
 - They both apply for the same job.
 - The man gets hired.

MEASURING DISCRIMINATION: CHALLENGES

1. Discrimination is difficult to observe.
2. Discrimination is difficult to detect.

A SOLUTION: FIELD EXPERIMENTS/AUDIT STUDIES

- Send matched pairs of nearly identical fictitious job applications to apply for real job openings.
- Randomly assign resumes a gender, often using gendered names (e.g., Michelle vs. Michael).
- Track employers' responses to each application (e.g., "callbacks").
- Because everything is held constant, other than the gendered name, any difference in "callback" rates can be attributed to gender discrimination.
- Solves the dual challenges of observation and detection.

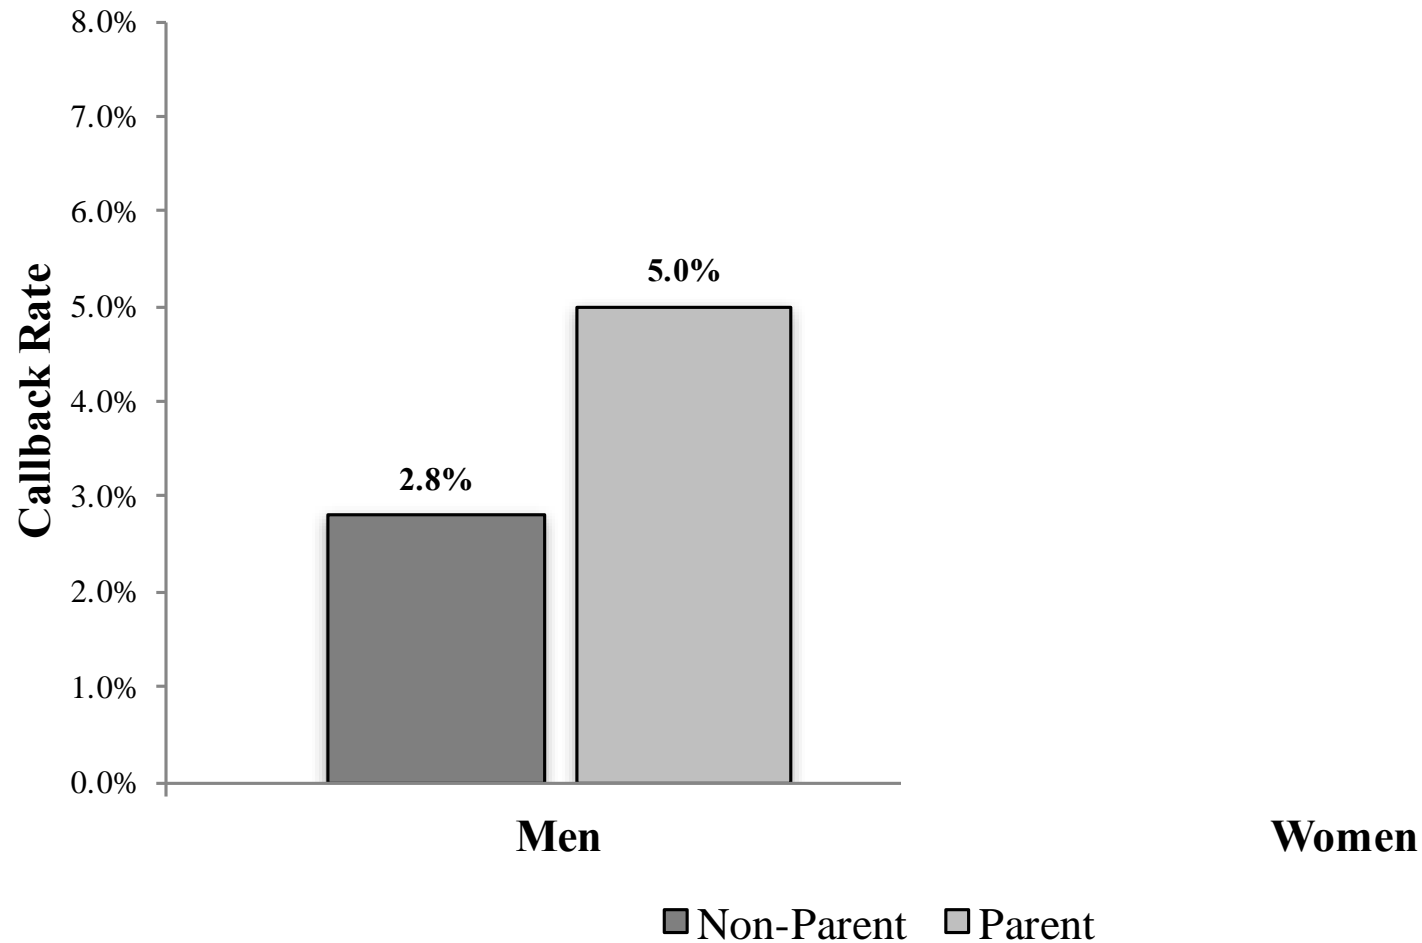

KEY FINDINGS ON GENDER DISCRIMINATION

GENDER & PARENTAL STATUS (CORRELL, BENARD, & PAIK 2007)

GENDER & PARENTAL STATUS (CORRELL, BENARD, & PAIK 2007)

GENDER & PARENTAL STATUS (CORRELL, BENARD, & PAIK 2007)

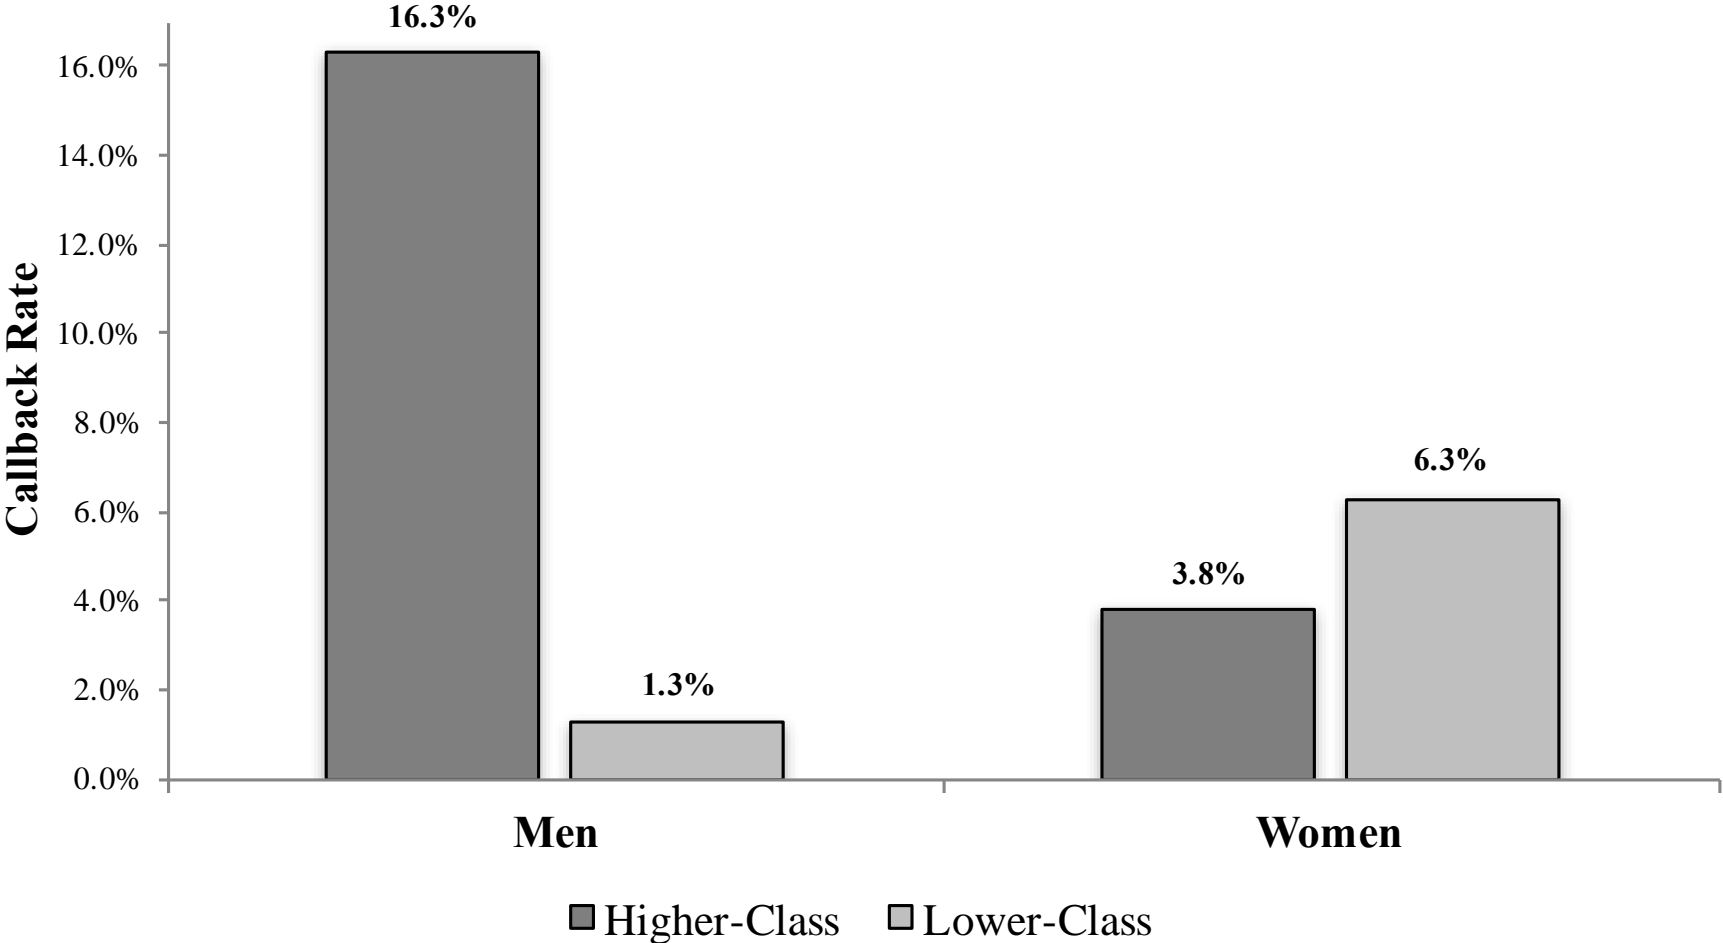

GENDER & CLASS BACKGROUND (RIVERA & TILCSIK 2016)

GENDER & CLASS BACKGROUND (RIVERA & TILCSIK 2016)

GENDER & CLASS BACKGROUND (RIVERA & TILCSIK 2016)

Rivera, Lauren A., and András Tilcsik. 2016. "Class Advantage, Commitment Penalty: The Gendered Effect of Social Class Signals in an Elite Labor Market." *American Sociological Review* 81(6):1097-1131.

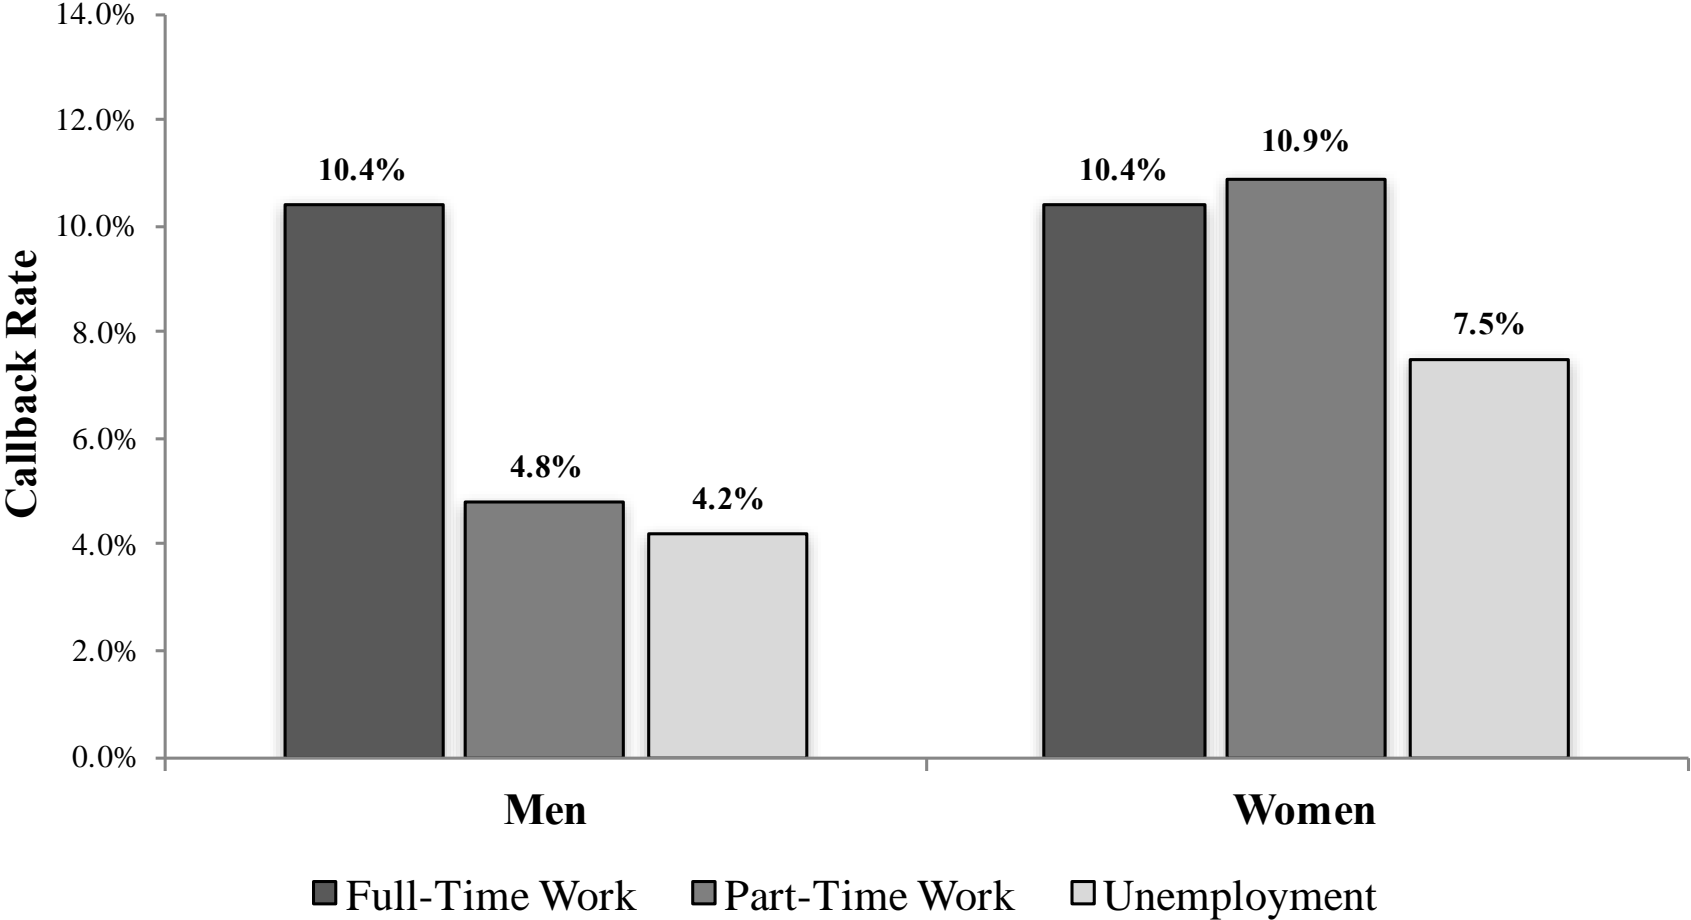

GENDER & EMPLOYMENT HISTORIES (PEDULLA 2016)

GENDER & EMPLOYMENT HISTORIES (PEDULLA 2016)

GENDER & EMPLOYMENT HISTORIES (PEDULLA 2016)

Pedulla, David S. 2016. "Penalized or Protected? Gender and the Consequences of Nonstandard and Mismatched Employment Histories." *American Sociological Review* 81(2):262-289.

GENDER & CONTEXTUAL FORCES (YAVORSKY 2017)

- **Contextual Forces & Gender Discrimination:**
 - Status of job (e.g., professional vs. working class).
 - Gender composition of job.
 - Gender-typing of job.
- **Field Experiment Findings (Yavorksy 2017):**
 - Women experience discrimination when applying for male-dominated working class jobs.
 - Men experience discrimination when applying for female-dominated jobs, across the status of the position.

KEY TAKE-AWAYS

- The effects of gender on hiring discrimination are complex and heterogeneous:
 - Parental status
 - Class background
 - Employment history
 - Contextual forces
- Commitment concerns are a key mechanism linking gender and hiring outcomes.
- Violations of gender norms also appear to be important in producing gender discrimination.

FUTURE DIRECTIONS: GENDER DISCRIMINATION

- Continued and additional attention to mechanisms:
 - Commitment
 - Competence
 - Fit
- Continued and additional attention to variation:
 - Policy and legal environments
 - Organizational demography
 - Organizational policies
 - Organizational practices
- Developing and testing interventions to reduce gender discrimination.

THANK YOU
